

**YES
SIDEWALKS**

**NO
POLES**

fixpepperdrive.org

Instructions:

- 1) Pick a pole. The telephone pole should be directly on Pepper Drive and does not have to be the closest to your house. Every Fix Pepper Drive Association member should have a pole – families should have at least two.
- 2) Print at least one of these posters on paper, cardboard or other backing that might last longer. Hint: you can cover it with clear packing tape to make it more weather-proof.
- 3) Post it to the pole. Heavy staples work well – or nails with large heads if the backing is a thicker material.
- 4) Go back regularly to make sure your pole poster is still there. Put up a new one if it is missing or tattered. Keep it up until the poles are gone.
